

UNDP Support to Suriname R-PP

- UNDP supported the government to mobilize resources to further develop the R-PP and stakeholder engagement (Guyana Shield Facility, UNDP Suriname, UN-REDD)
- R-PP has been significantly improved in the last 6 months
- UNDP concurs with TAP assessment

Issues that have been raised

UNDP notes that stakeholder concerns have been raised, including the need to further:

- Ensure the R-PP reflects the government's commitment to implementing the **Saramaka judgment**
- Improve and clarify **mechanisms for inclusive participation** in the design of the R-PP (and eventual implementation of the associated project); including channels for identifying representatives
- Strengthen existing or identify alternative mechanisms for **addressing grievances in line with FCPF Guidelines on Grievance** (independent, legitimate, transparent etc.)

Process going forward

- UNDP will support further discussion on how to address remaining issues in Contact Group and through, e.g. Resolution Annex
- UNDP will support Suriname to:
 - Revise R-PP in accordance with Resolution and develop a project document through an inclusive process
 - Meet UNDP and Common Approach standards (including stakeholder engagement, SESA, FPIC, grievance)
